

It is the Perseus Biomics mission to redefine the analysis of microbiomes. Through a novel analysis approach, we are able to effectively and accurately identify the composition of these mixtures and their changes over time, uncovering the role of the microbiomes in human health and environment. Perseus Biomics designs and constructs a new generation of genetic analysis devices to analyze the full genetic makeup of microbiomes.

Perseus Biomics bv is committed to satisfying our customers and stakeholders by consistently provide services that meet or exceed their requirements and expectations.

To ensure laboratory competence on a daily basis, Perseus Biomics bv has decided to introduce and maintain a management system for quality, body and laboratory operations in accordance with the ISO/IEC 17025 standard.

Perseus Biomics bv therefore takes all appropriate measures to continuously guarantee and improve the quality of our services.

This quality policy is an essential part of our organization. The responsibility for evaluating and conducting the quality policy is dedicated to the management of Perseus Biomics bv.

The management of Perseus Biomics bv will make all employees aware of this quality policy and foresee the necessary resources to implement the quality management system. We expect that all our employees must regard quality as fundamental in the performance of their tasks.

This quality policy, approved by the CEO, will be communicated to all employees of Perseus Biomics bv and is available to all our customers and stakeholders.
